"First quarter results reflect the strong fundamentals of our Company and of the markets we are serving. We have significantly increased volumes in most of our products and the newly acquired assets will start to contribute to our shipment volumes and financials in Q2. All of our end markets are showing strong demand and high capacity utilizations," said Pedro Larrea, CEO of Ferroglobe. "Prices in all of our products have continued to increase, and supply/demand dynamics in our industry provide a good support for continued healthy pricing levels."

Cash flow generation affected by acquisition of new assets

Working capital increased by \$57.5 million during the period. The new assets acquired from Glencore AG on February 1, 2018 have contributed \$55.5 million to this working capital increase.

Ferroglobe continued to generate positive cash flows. During the first quarter, cash flows used for operations was \$20.4 million. Excluding the cash flows related to Glencore AG, the Company generated operating cash flows of \$35.5 million.

Ferroglobe's net debt was \$449.3 million as of March 31, 2018, up from \$386.9 million as of December 31, 2017. The increase in net debt is mainly due to the \$55.5 million working capital increase from the acquisition of the new assets from Glencore AG on February 1, 2018, including the build-up of inventories of raw materials (mostly manganese ore) and finished goods (ferromanganese and silicomanganese) of the new plants. Excluding the impact of the Glencore AG acquisition, net debt increased by \$6.6 million as compared to December 31, 2017. Net of one-off items, the Company generated over \$35 million of cash during Q1.

The Company has decided to reinstate a dividend payment

The Board of Ferroglobe has decided to declare an interim dividend of \$0.06 per share, reflecting the confidence in the underlying strength of the business and the Company's long-term outlook. The dividend will have a record date of June 8, 2018 and a payment date of June 29, 2018.

About the Board's decision, Javier López Madrid, Executive Chairman of Ferroglobe, said, "As we balance our capital allocation alternatives, we believe this level of dividend is an effective way of returning value to shareholders, while continuing to focus on strengthening our balance sheet."

Non-IFRS Measures

EBITDA, adjusted EBITDA, adjusted diluted profit (loss) per ordinary share and adjusted profit (loss) attributable to the parent are, we believe, pertinent non-IFRS financial metrics that Ferroglobe utilizes to measure its success.

Ferroglobe has included these financial metrics to provide supplemental measures of its performance. The Company believes these metrics are important because they eliminate items that have less bearing on the Company's current and future operating performance and highlight trends in its core business that may not

otherwise be apparent when relying solely on IFRS financial measures.
